

Excel Power Tools

Five everyday functions for cleaner, faster spreadsheets

Filter

Toggle drop-down filter arrows on your header row to show, hide, or narrow down rows by value.

Ctrl+Shift+L

Comment

Add a threaded comment to a cell to start a discussion or @mention a collaborator.

Ctrl+Alt+M

Note

Attach a classic sticky note to a cell for a private reminder — no reply thread.

Shift+F2

Sort

Reorder rows by one or more columns — A-Z, Z-A, by value, color, or a custom list. Data tab → Sort.

Ribbon-based — no single default shortcut

Slicer

Clickable visual buttons that filter a Table or PivotTable instantly. Insert tab → Slicer.

Ribbon-based — no single default shortcut
